Christine Surmont
Assistant
Cefic, Petrochemicals
Europe

- Welcome and introduction (Ph de Smedt)
- The NMP restriction and introduction to the NMP Safe Handling Guideline (P Mäkelä)
- Using the guideline to comply with the NMP restriction (C Fetter)
- Monitoring and checking compliance (R Beetstra)
- Questions from the audience via chat (J-O Eichler-Haeske)
- Concluding remarks (Ph de Smedt)

- Our original intention was to have a **workshop** of one day on the subject on 18 March. However, due to Covid-19 we had to take the decision to postpone this workshop.
- We still intend to maintain this workshop. Retained date : **1st of December 2020**. At the workshop we will be able to **dive into more details** in some of the topics addressed today. Moreover, it will be more interactive with some **case studies** allowing participants to derive themselves a risk mitigation plan for concrete cases. We also intend to have either a site visit or a virtual tour in a site handling NMP.

THANK YOU
FOR YOUR
ATTENDANCE
